Forecast for Tuesday 14 Dec 2021

Weather: Rather cloudy across southern and western hills with a few spots of drizzle, otherwise dry with clear spells overnight. A largely dry and bright day is expected, although southern and western hills look cloudier with, at first, a few spots of drizzle with northern and eastern hills seeing some good spells of sunshine.

Chance of cloud free mountain/hill tops above 800m: Little chance across southern and western hills, but around 75% across the north and east.

Visibility: Periods or persistent cloud above 300-450m across southern and western fells, but cloud more occasional above about 600m across the north and east. Away from cloud visibility good or very good falling to several kilometres in drizzle.

Meteorologist's View

Gusts around 45mph over ridges and summits. Thaw of lying snow.

Forecast for Wednesday 15 Dec 2021

Weather: Mostly cloudy across the south and west with patchy drizzle, and a thaw of lying snow continuing. Eastern and northern hills expected to see some good spells of sunshine.

Maximum wind: Southwesterly 25-30mph, gusts around 45mph over ridges and summits, easing 15-20 mph by afternoon.

Chance of cloud free mountain/hill tops above 800m: Little chance across southern and western hills, but nearer 75% across more eastern and northern hills.

Visibility: Periods or persistent above 300-450m, but cloud more occasional above 600m in the north and east. Away from cloud visibility good, perhaps falling to several kilometres in drizzle.

Temperature: **Valleys:** Plus 6 or 7 Celsius rising to plus 11 Celsius by day
At 800m: Around plus 5 Celsius
Freezing level: Above the summits
